Dear Year Three,

I hope you had a lovely week and managed to spend some more time outdoors - maybe even at the park! Thank you for continuing to complete all of your work. I am very proud of you!

Mrs Slevin and I are still missing you very much and cannot wait to see you when we are back in school.

Last week, you were set a special task of putting a rainbow picture in your window. I am sure these have brought smiles to many people's faces! This week, your special task is to help your family cook a meal (with adult supervision) 😊

Keep safe!

Miss Villers

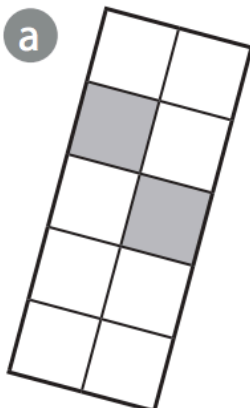

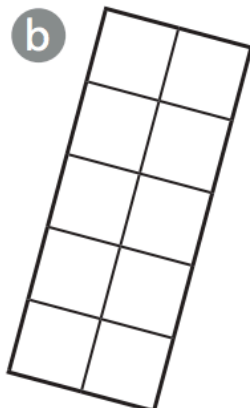

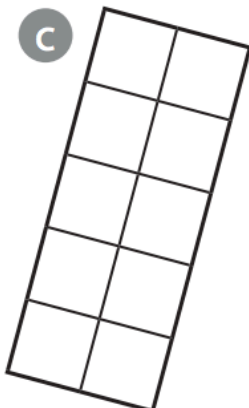

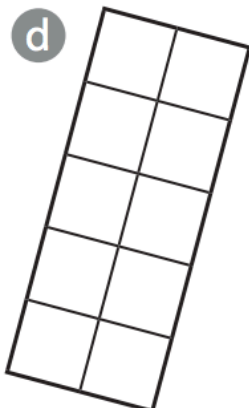

*Maths Activity One*

**1** Complete the following.

a  $\frac{4}{10}$      $\frac{5}{10}$      $\frac{\square}{10}$      $\frac{7}{10}$      $\frac{\square}{10}$      $\frac{\square}{10}$

b  $\frac{13}{10}$      $\frac{\square}{10}$      $\frac{\square}{10}$      $\frac{10}{10}$      $\frac{\square}{10}$      $\frac{\square}{10}$

**2** Shade squares in **b**, **c** and **d** so that the pattern goes up in **tenths**. Then write the number of **tenths**, as shown below.

a	b	c	d
			
2 tenths	<input type="text" value="tenths"/>	<input type="text" value="tenths"/>	<input type="text" value="tenths"/>

**3** Write the missing fractions on the number line.

Recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10

1

a Azra ate 1 piece of the pizza. What fraction of the pizza did she eat?  $\frac{\square}{\square}$

b Bilal ate 3 pieces of pizza. What fraction did he eat?  $\frac{\square}{\square}$

3 Amy shared her chocolate equally between herself and **nine** friends.

What fraction of a whole bar of chocolate did they each get?  $\frac{\square}{\square}$

## Recognise, find and write fractions of a discrete set of objects

**1** Complete the following.

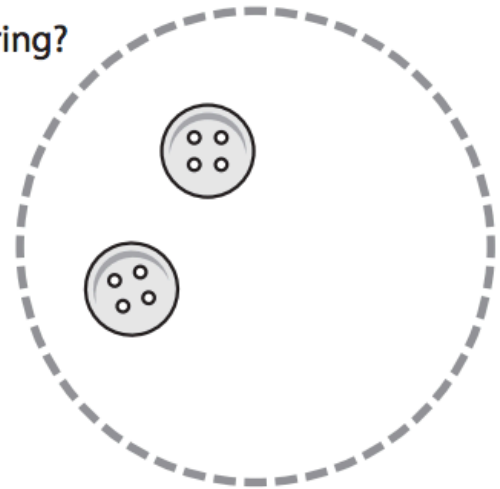

**a** What fraction of the shapes are squares?

**b** What fraction of the shapes are circles?

**2** What fraction of the buttons are **not** in the ring?

**3** Look at the box of chocolates.

**a** Harry eats **5** chocolates.

What fraction of the chocolates does he eat?

**b** Lucy eats **2** of the chocolates.

What fraction of the chocolates are left after Harry and Lucy have eaten their chocolates?

## Identify fractions on a number line and deduce relations between them

- 1** Draw arrows from each fraction to the correct place on the number line.  
An example is shown.

- 2** Use the number line above to help you solve the following.

- a** How many **quarters** greater than  $4\frac{3}{4}$  is  $5\frac{1}{4}$ ?
- b** How many **quarters** less than  $7\frac{1}{4}$  is  $5\frac{1}{2}$ ?

- 3** On the number lines below, mark and label the fraction which is 1 whole bigger than the fraction shown.

Recognise and use fractions as numbers, understanding the relationship between unit fractions as operators and division by integers

1 Shade  $\frac{1}{3}$  of the circles, below.

2  $\frac{1}{4}$  of the cars are red. How many cars are red?

3 Jordan bakes 24 cakes. He takes  $\frac{1}{8}$  to school.

How many cakes does Jordan take to school?

4 40 children went swimming.  $\frac{1}{10}$  of them were boys.

How many boys went swimming?

5  $\frac{1}{5}$  of the dolls have blue shoes and  $\frac{1}{3}$  have red shoes.

a How many dolls have blue shoes?

b How many dolls have red shoes?
