Clue 1

You have followed the tracks left by the dog and noticed where it stopped to answer a call of nature. This gave you a clue to the dog's identity. Solve these calculation strings (from left to right) to find the answer to the clue. The answer to each calculation string gives a number that corresponds to a letter in the alphabet (a = 1, b = 2, c = 3 etc.) which, put together, spells out the answer. The first one has been solved for you.
