Hay Fever Hell

If you're a hay fever sufferer you might not want to read on! Hay fever is an allergy to pollen that affects nearly a quarter of the UK's population.

At this time of year when plants are releasing their pollen to reproduce the air can be full of it causing misery to millions of people.

CO₂ to Fuel

A Canadian company has been developing technology that can remove CO₂ from the air – just like trees do.

They have showed that they can capture carbon for under \$100 a tonne. Their immediate goal is to produce synthetic liquid fuels made from carbon and renewable energy.

The Primary Science Teaching Trust are once again raising the bar of primary science professional development for teachers. **Interested in presenting at PSEC 2019? Submit your proposal [here](#).**

Following the outstanding success of the International Conference in Belfast in 2016, [PESC 2019](#) will take place in Edinburgh from June 6th – 8th and already promises to be a conference not to be missed. You can register your interest now at <https://primaryscienceconference.org/>

The Great Science Share for Schools is a national campaign to engage young people in sharing science with new audiences.

It takes place on 19th June 2018 – It's not too late to register your participation and download free guidance and resources [here](#).

[Wow Science](#) is an outstanding new resource from the Primary Science Teaching Trust (PSTT) and Learning Science Ltd.

It provides links to the best primary science learning materials on the web, helping children to enjoy science both inside and outside the classroom.

The resources are an excellent tool for teachers, students and parents. All the resources have been approved by the PSTT for quality and suitability, ensuring the content is accurate and useful to learning.
